Professional Summary

Corporate Analyst Development Program Analyst with experience across CIB Payments and Corporate Sector Supplier Relationship Management. Builds scalable Python- and AI-enabled automation to strengthen validation controls, streamline workflows, and improve data-driven decision-making. Experienced in cross-functional collaboration, executive presentations, and driving automation adoption across product and operations teams.

Core Skills

Python | SQL | APIs | LLM Integration & Prompt Engineering | Process Automation | Data Extraction & Transformation | Excel | Tableau | Alteryx | Reporting & KPI Monitoring | Cross-Functional Collaboration | Executive Presentation

Professional Experience

JPMorganChase – Plano, TX | Corporate Analyst Development Program (2024 – Present)

Corporate Sector | Global Supplier Services | Gold Supplier Program (December 2025 – Present)

- Designed and launched analysis-ready internal and external stakeholder surveys for the Gold 2.0 relaunch, communications (teasers, launch emails, reminders), and a response-tracking system for process monitoring
- Automated a manual supplier data reconciliation process to match name variations across files and built a centralized dashboard consolidating supplier performance and survey insights to support Gold designation decisions

Commercial & Investment Bank | Payments | Merchant Services | Client Insights & Analytics (April 2025 – November 2025)

- Automated a core deal review controls process by developing a Python-based rule engine that routed pilot client solutions to structured review pathways, eliminating manual slide preparation, standardizing decision logic, reducing meeting time by 50%, and shortening the deal lifecycle by two business days
- Built automated email reporting to distribute weekly routing outcomes and go/no-go summaries, improving governance transparency
- Developed KPI monitoring to track meeting time reduction, deal trends, and product risk indicators

Commercial & Investment Bank | Payments | Merchant Services | Product Brand Implementations (July 2024 – March 2025)

- Developed an AI-enabled proof of concept (PoC) to extract key fields from card-brand change PDFs using Python and LLM-based prompt engineering, automatically populating SharePoint and reducing manual intake effort equivalent to ~1 FTE
- Supported release-weekend validation across 7 epics by executing SQL transaction checks and communicating outcomes to stakeholders
- Built Jira change-detection automation using Python to generate reports, replacing hours of manual review
- Developed a Visa reclassification monitoring report using SQL and Python to highlight transaction spikes and distribute automated pivot summaries
- Designed a Selenium-based proof of concept (PoC) to verify ARNs and clearing files in Visa Resolve Online, demonstrating feasibility of automated detection and potential cost-avoidance exposure
- Implemented a Python workflow enabling team members to upload and execute SQL validation scripts via SharePoint, automatically generating summary emails with execution status and results, reducing backlog and supporting release-weekend validation

JPMorganChase – Plano, TX | Corporate Analyst Development Program Intern (June 2023 – August 2023)

Consumer & Community Banking | Risk & Security Assessment Review (RSAR)

- Cleaned and analyzed complex datasets using Alteryx to support risk assessment reviews
- Built a Tableau dashboard and presented insights to leadership to enhance reporting processes

Education & Certifications

The University of Texas at Austin – McCombs School of Business

Graduate Certificate in AI & Machine Learning: Business Applications (June 2025 – March 2026)

The University of Oklahoma – Price College of Business

B.B.A., Management Information Systems & Marketing Majors | Management Minor | Magna Cum Laude (2020 – 2024)

Certifications: Introduction to AI Agents, Ethics of AI (UT Austin, 2025) | Designer Core Certification, Foundational Micro-Credential (Alteryx, 2023)
